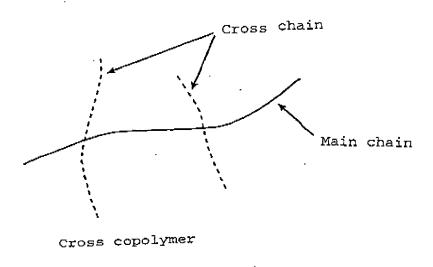

# FIG.1

## FIG.2

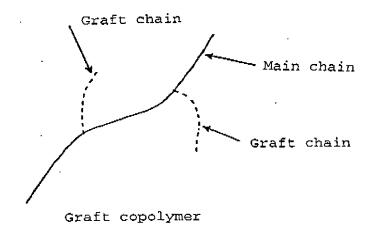

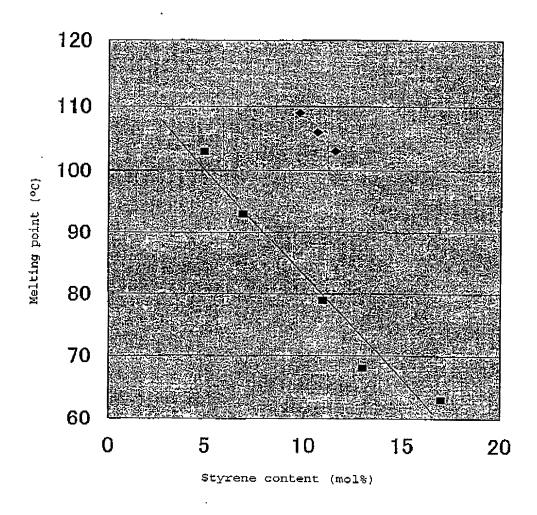

FIG. 3

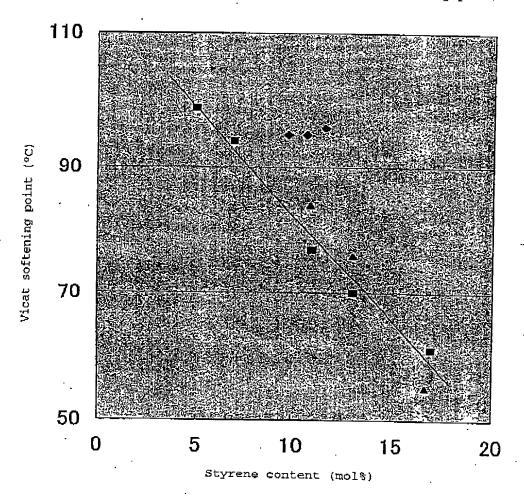

Relation between styrene content and melting point

- Cross-copolymer (Example)
- Ethylene/styrene copolymer (Comparative Example)

FIG.4

Relation between styrene content and Vicat softening point

- Cross-copolymer (Example)
- Ethylene/styrene copolymer (Comparative Example)
- Ethylene/styrene copolymer blend (Comparative Example)

FIG.5

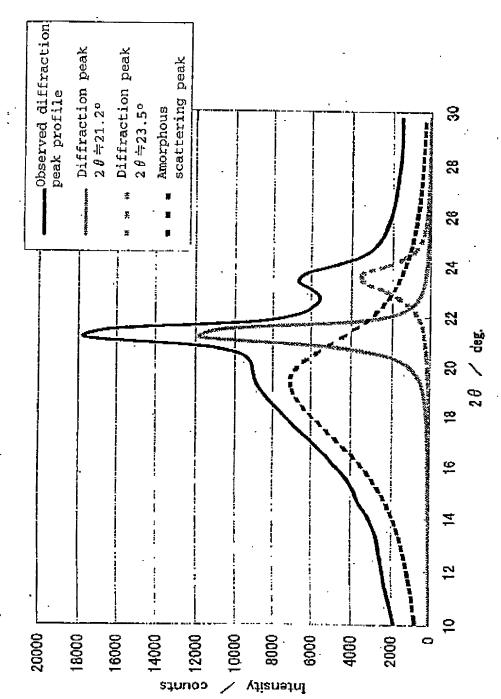

FIG.6

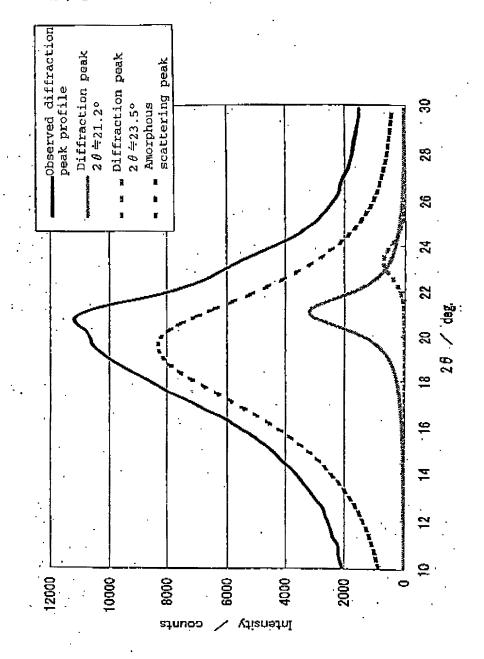

FIG.7  $tan(8)(-\Delta)$ 

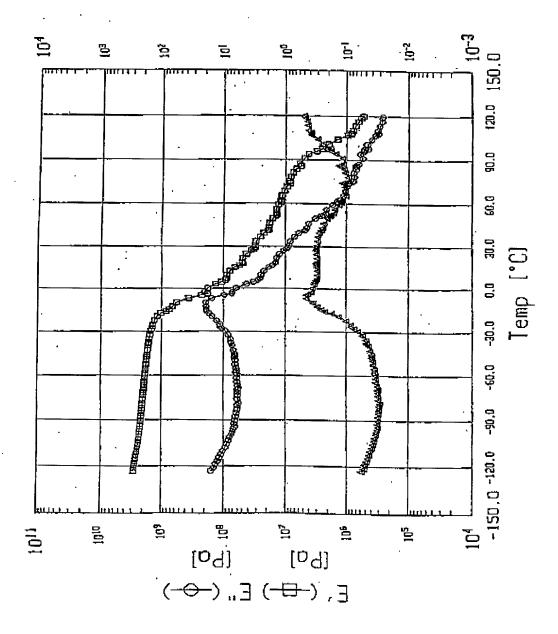

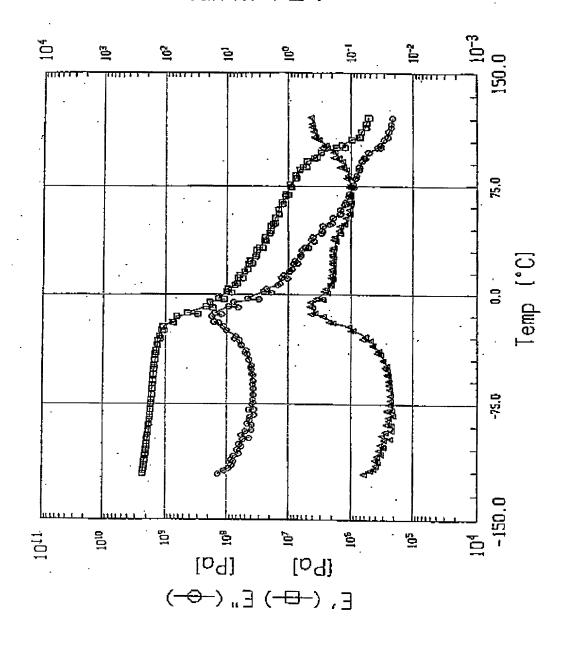

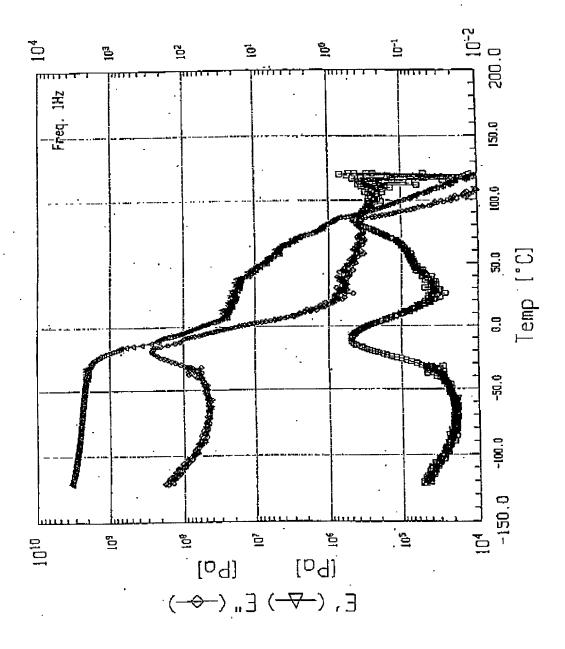

FIG.8  $tan(S)(-\Delta)$ 

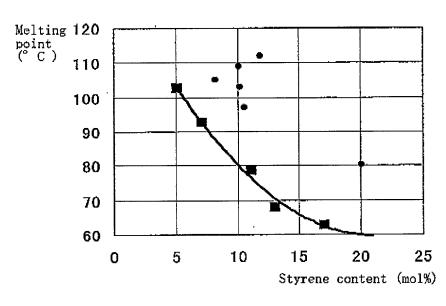

**FIG.9** tan(δ)(<del>---</del>)

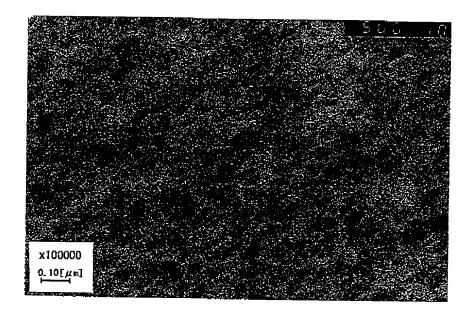

### F I G. 10

Relation between composition and melting point

- Examples
- Comparative Examples Et-St copolymer
- Polynominal (Comparative Example Et-St copolymer)

F I G. 11

F I G. 12
